

# Revolutionizing Maintenance Efficiency:

How a Leading Beverage Manufacturer  
Found the Perfect Fit with InConn's  
**CMMS Mobile-First Solution**

## About the Company

Our client is a global beverage giant and a renowned leader in the food and beverage industry. With an expansive reach and a commitment to quality, they operate on a massive scale, making their maintenance operations a critical aspect of sustaining production and ensuring product excellence.

## Asset Management Challenges Faced

### Manual Note-Taking Hassles:

Technicians were burdened with a time-consuming process of manual note-taking, leading to inefficiencies in data input and management within the CMMS system.

### Absence of Mobile App:

The existing CMMS system lacked a crucial mobile application, hindering the mobility and real-time accessibility essential for efficient maintenance operations.

# InConn's Tailored Solutions

## → Streamlined Onboarding Process:

The implementation process of InConn's solution included a meticulously designed onboarding process, ensuring a smooth transition for all users involved. The user-friendly interface facilitated quick adaptation and seamless integration into daily operations.

## → Innovative CMMS Mobile-First Solution:

InConn introduced a state-of-the-art CMMS mobile-first solution, bridging the mobility gap and providing technicians with a platform that aligns seamlessly with the dynamics of their tasks.

## → Enhanced Visibility, Communication, and Tracking:

InConn's solution brought about a paradigm shift by significantly enhancing visibility into maintenance operations. The platform's advanced communication features and robust tracking capabilities empowered the technician team with real-time insights, fostering efficient decision-making and task prioritization.

## Value Delivered

Customer requests for maintenance increased from one to two per day to one to two per hour.

Automated workflows triggering work orders without managerial intervention.

Technicians empowered with clear visibility into prioritized assets.

Efficient shift transitions with readily available information.

Successful achievement of a 30-minute to two-hour response time.

## Conclusion

By effectively tackling challenges related to mobility and data management, InConn contributed to streamlining the client's maintenance processes while enhancing visibility, communication, and tracking capabilities.

## About InConn

InConn pioneers in providing IoT-Powered Asset Management solutions that transform the way facilities connect, analyze, and use data from their assets. Our innovative solutions leverage cutting-edge technology to redefine traditional asset management practices. Our advanced CMM software ensures swift real-time updates and status tracking, converging precision, compliance, and resilience for integrated operational excellence.
