

# Transforming Maintenance Practices:

A premier Automotive Parts Manufacturer achieved a whopping 200% Boost in Operational Efficiency with InConn CMMS

## About the Company

Our client, a prominent player in the automotive industry, sought to transition from reactive to preventive maintenance to enhance operational efficiency. The company faced challenges managing maintenance through a cumbersome spreadsheet system, resulting in breakdowns and inefficiencies.

## Asset Management Challenges Faced

### Outdated Spreadsheet System:

The client's maintenance manager relied on an outdated spreadsheet system, leading to heavy paperwork and poor data organization.

### Increased Breakdowns:

The inefficiencies in the existing system resulted in frequent breakdowns, highlighting the need for a more robust maintenance management solution.

# InConn's Tailored Solutions

## → Innovative CMMS Implementation:

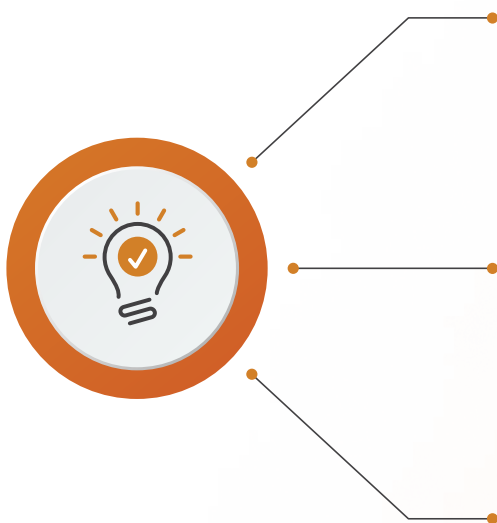

InConn CMMS emerged as the solution to client's challenges, offering a user-friendly interface and a seamless onboarding process for numerous technicians.

## → Efficient Data Tracking and Analysis:

InConn CMMS prioritized tracking and analyzing data, providing the maintenance team with a tool to locate problem areas and enhance overall data management..

## Value Delivered

### **Enhanced Data Management:**

The maintenance manager can now track crucial information with ease, identifying assets causing breakdowns and addressing issues promptly.

### **Shift from Reactive to Preventive Maintenance:**

The client's Technologies witnessed a remarkable shift from reactive to preventive maintenance, leading to a 200 percent increase in mean time between failures.

### **Drastic Reduction in Reactive Work Orders:**

The implementation of InConn CMMS resulted in a significant decrease in reactive work orders, plummeting from upwards of 60 percent to a mere 20 percent today.

## Conclusion

By seamlessly addressing challenges through a user-friendly interface, efficient data tracking, and a shift to preventive maintenance, InConn has not only enhanced client's data management but also significantly improved operational efficiency.

## About InConn

InConn pioneers in providing IoT-Powered Asset Management solutions that transform the way facilities connect, analyze, and use data from their assets. Our innovative solutions leverage cutting-edge technology to redefine traditional asset management practices. Our advanced CMM software ensures swift real-time updates and status tracking, converging precision, compliance, and resilience for integrated operational excellence.
